Forecast for Monday 12 Apr 2021

Weather: Conditions will be poor through the morning, cold and cloudy with sleet and snow expected across the region. Snow will become increasingly wetter turning to sleet and rain at all levels by lunchtime. The afternoon will be brighter and somewhat drier with the risk of an isolated rain shower. Remaining cold throughout.

Chance of cloud free mountain/hill tops above 600m: Less than 10% becoming 100% by the afternoon.

Visibility: Visibility will be very poor first thing with cloud bases 300-600m with sleet and snow, they improve slowly through the day as cloud bases lift and break up to above 1000m by mid-afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A cold and wet start will mean you will need waterproofs and layers first thing as it will feel quite wintry. Although it will be a brighter afternoon, it will feel quite variable so dress sensibly and wear sun protection.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 11 Apr 2021	0.6mm	0.8mm	4.8mm

Forecast for Tuesday 13 Apr 2021

Weather: A much brighter day is likely through Tuesday. The best of the sunshine will be first thing, with more cloud and the odd shower developing by late morning across the area. In the sunshine it will feel much more pleasant than recent days, though still cool on hill tops. It will also still be a colder start and end to the day with patches of frost and fog bringing poor visibilities for a time.

Maximum wind: South-westerly, becoming North-westerly by lunch time, 10mph with gusts 15mph.

Chance of cloud free mountain/hill tops above 600m: 100% becoming 70% by mid-morning.

Visibility: Generally very good visibility is likely through the day. Though it may be poor in valleys, at the start and end of the day, in any fog. Visibilities will also suddenly drop to poor temporarily in showers as cloud bases drop to 700-900m.

Temperature: **Valleys:** Plus 2 Celsius increasing to Plus 8 Celsius.
At 600m: Minus 1 Celsius becoming Plus 3 Celsius.
Freezing level: 1000m.
